A tag line in every entry page is used to automatically generate the sidebar. The automatic pages are ordered alphabetically.

The tags used for the menu are

- IEMT
- Related
- Anatomy

- Person
- M

Additional tags can be added and used for lists, search, change the menu later on or tag clouds ([Folksonomy](#))

If none of the 4 Tags above or M (aka Manual Menu entry) is set the page won't show in the sidebar.

We can add tags to every page like so: { { tag>tag1 tag2 tag3 } }

multiple word tags: { {tag>tag1_with_multiple_words tag2 tag3_part} } { { tag>"tag with spaces" tag2} }

Within quotes you can use spaces. Tag is stored internally with underscores `_`. The plugin documentation is at <https://www.dokuwiki.org/plugin:tag>
